1. Recently the Rumanian War Office distributed questionnaires to all important industries requiring them to state how long it would take to convert to the production of war material. Replies from the principal factories have been received and were discussed at a meeting attended by the interested parties.
 2. The Astra Vagoane Works at Brasov stated that they required six months to convert to ammunition production. They have a modern plant capable of turning out artillery shells up to 150 mm. caliber.
 3. The Malaxa Works stated that it would take them four months before armaments production could be restored.
 4. Both the Margineanca Ammunition factory situated between Ploesti and Targoviste and the Malaxa factory at Tohan would require one to two months to reach a level of war production.
